Benefit Payment Example

Kathy's daughter, Molly, was riding her bike to school. On her way there she fell to the ground, was knocked unconscious, and was taken to the local emergency room (ER) by ambulance for treatment. The ER doctor diagnosed a concussion and a broken tooth. He ordered a CT scan to check for facial fractures too, since Molly's face was very swollen. Molly was released to her primary care physician for follow-up treatment, and her dentist repaired her broken tooth with a crown. Depending on her health insurance, Kathy's out-of-pocket costs could run into hundreds of dollars to cover expenses like insurance co-payments and deductibles. MetLife Group Accident Insurance payments can be used to help cover these unexpected costs.
